DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114.

Applicant's submission filed on November 17, 2006 has been entered and made of record.

Information Disclosure Statement

2. The information disclosure statement filed 11/17/2006 fails to comply with the provisions of 37 CFR 1.97, 1.98 and MPEP § 609 because copy of the English-translation for each cited document has not been provided. It has been placed in the application file, but the information referred to therein has not been considered as to the merits. Applicant is advised that the date of any re-submission of any item of information contained in this information disclosure statement or the submission of any missing element(s) will be the date of submission for purposes of determining compliance with the requirements based on the time of filing the statement, including all

certification requirements for statements under 37 CFR 1.97(e). See MPEP § 609.05(a).

Response to Arguments

3. Applicant's arguments filed on November 17, 2006 have been fully considered.

4. Applicant's arguments with respect to 35 U.S.C. 112, first paragraph rejection is not persuasive. Applicant's arguments amount to a general allegation that the claims define a patentable invention without specifically pointing out how and where the languages of the claims are supported in the specification.

Examiner hereby maintains 35 U.S.C. 112, first paragraph rejection.

5. Applicant's arguments with respect to Claims 15 – 25 are not persuasive.

Applicant argues that the prior arts (Colosso U.S. Patent Number 6,169,976) do not teach limitation "transmitting the generated encryption key and a computer-dedicated player, which plays deciphered downloaded content, to the customer". This argument is not persuasive.

With respect to "transmitting the generated encryption key and a computer-dedicated player, which plays deciphered downloaded content, to the customer", Colosso teaches generating and transmitting an encryption key to the customer.

Art Unit: 2136

Furthermore, Colosso teaches installing licensed product (computer –dedicated player) that plays deciphered downloaded content (with license level and encrypted activation key) (See Colosso Column 3 lines 45 – Column 4 line 6).

Therefore, the examiner respectfully asserts that the cited prior art does teach or suggest the amended subject matter broadly recited in the independent claims. The dependent claims are rejected at least by virtue of their dependency on the dependent claims. Accordingly, the rejection for the pending claims 15 – 22 is respectfully maintained.

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

6. Claims 15 – 25 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

The amended independent Claims 15, 18, 21 and 22 read, " ... a computer-dedicated player, which reproduces downloaded content,".

With respect to “a computer dedicated player, which reproduces downloaded content”, although the specification discloses the system can prompt the user for personal information to be sent to the site server and then the site server generating an encryption key unique to the customer, and the generated encryption key is downloaded and stored in the customer computer, the specification does not disclose a method for a computer-dedicated player, which reproduces downloaded content. Applicant's remarks does not direct wherein the instant specification “Computer-dedicated player, which reproduces downloaded content” is disclosed.

The dependent claims 16, 17, 19 – 20 and 23 – 25 are rejected at least by virtue of their dependency on the dependent claims.

Examiner suggests amending the claims with attention given to specification paragraph [0028 and 0034], wherein the disclosure explicitly reads, “a computer-dedicated player 50a is downloaded (3)” and “The encrypted content downloaded to the customer computer 60 is **deciphered** using the encryption key downloaded in step170, and can be reproduced by the computer-dedicated player 50a”. Examiner directs applicant's attention to the disclosure wherein the computer-dedicated player reproduces the **deciphered content** and does not reproduce downloaded (encrypted) content (**emphasis added**).

Claim Rejections - 35 USC § 102

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.
